BLACKSTONE

KENTUCKY BLUEGRASS

Elite Cultivar, Very early spring green up, excellent winter color, good low mow, highly rated for disease resistance, widely adaptable. Dense and wear tolerant. Excellent under tough conditions.

(COMPACT TYPE)

Uses: A best choice for over seeding and new construction of high quality bluegrass turf including fairways and tees. **BLACKSTONE** also can be used as a dense, attractive first cut rough to contrast Bentgrass fairways. This is an excellent choice for over seeding of high maintenance Bluegrass athletic fields. When used in a program of optimum fertility and managed soil P.H., it will spread and withstand wear, traffic and mechanical damage. Always spread the genetic base of your Kentucky bluegrass mixes by using 3 or more “types” in your mixes.

Geographical Adaptation: **BLACKSTONE** will thrive throughout the range of Kentucky bluegrasses adaptation. Due to its strong genetic breadth it has adaptability in the Northern quarter of the transition zone under appropriate management.

Features: **BLACKSTONE** features density, ability to withstand ½” cut, and offers rhizomatous repair of damaged areas for the customer who unquestionably wants the highest quality obtainable. Very highly rated overall turf trial variety, including excellent performance in transition zone.

Rate: Overseeding: 2 – 3 lbs./1,000 Sq. Ft.

New Seeding: 2.5 – 3.5 lbs./1,000 Sq. Ft.
