THE FUTURE

LANDMARK
SEED COMPANY

SERENE

KENTUCKY BLUEGRASS

Excellent wear tolerance, good shade tolerance, stronger-wider blades than common types, attractive medium color, highly rated disease resistance, excellent spring density, widely adaptable. Tolerates lower mowing heights.

(CHERI TYPE)

Uses: A best-choice for over seeding and new construction of PREMIUM Bluegrass fairways and tees, commercial turf, lawns and athletic fields. **SERENE** can be used as a dense, attractive first cut rough to contrast Bentgrass fairways. This is an excellent choice for over seeding of high maintenance Bluegrass athletic fields. When used in a program of high fertility and managed soil P.H., it will spread and withstand cleat wear, traffic and mechanical damage. Always spread the genetic base of your Kentucky bluegrass turf by using 3 or more “types” in your mixes.

Geographical Adaptation: **SERENE** will thrive throughout the range of Kentucky bluegrasses adaptation. Due to its strong genetic breadth it has adaptability in the Northern quarter of the transition zone under appropriate management.

Features: **SERENE** features density, and offers rhizomatous repair of damaged areas for the customer who unquestionably wants the highest quality obtainable.
MD/VA RECOMMENDED CULTIVAR.

Production Areas: Washington, Oregon, Idaho

Rate: Overseeding: 2 – 3 lbs./1,000 Sq. Ft.

New Seeding: 2.5 – 3.5 lbs./1,000 Sq. Ft.
